Sticks 3000

Design: schmidt hammer lassen design

Simplicity by design is the principle behind **Sticks 3000** created by schmidt hammer lassen. The lines of the black or grey-enamelled aluminium housing are continued in single or double light slots in opalised plastic. At daylight, **Sticks** is simply part of the environment; at night, light predominates and the surroundings step into character.
Sticks 3000 is available with base for embedment or flanged base for mounting on solid ground. Available with LED.
