

Square Bollard

Design: schmidt hammer lassen design

With light slits at the top and bottom, Square offers a soft light without glaring. The downwards light is dominant due to the position of the lamps.

In case of interior use Square can be turned upside down, but when used outdoors the correct orientation is important due to drainage of moisture.

Square is available with shaded top and downward light only.

Characters and symbols can be cut out in the front, resulting in clear signage even at darkness
